NA Graphics June 2004

During the summer, the train's whistle reminds us of the past.

Snow often accompanies early season trains.

Kendall Mountain dominates the view from our office.

The Silverton Brass Band is another local reminder of "the old days."

NA Graphics is housed in the building on the leftThe Pickle Barrel Restaurant on the right was opened by NA owner Fritz Klinke in the early 1970s.

Whatever the time of day or year, the views are always spectacular. (Above and below)

 ${\it The jewel is hidden "under" the clouds.}$

Some have called it Shangri-la.

PHOTO POLYMER PROCESSING UNITS - Quality Design, Durable, User Friendly, Low Maintenance JET "THREE-IN-ONE-COMPLETE" Photopolymer Processor

NA Graphics offers these units as the top of the line professional plate maker.

Other types of photopolymer plates, are available.

Quality Design: 100% Stainless steel construction. Rugged and rustproof, beautiful in its simplicity. Efficient, compact design fits neatly into any production area. Arrives fully assembled. Features thermostatic control of washout and oven sections. Ultra fine brushes insure a thorough, clean, high resolution etch.

Durable: Discriminating buyers prefer the Jet "Three-In-One" for its long track record of durable, reliable service. Its efficient design, internal and external components have remained virtually unchanged since its introduction in 1978. User Friendly: The Jet "Three-In-One" operates on basic timers and toggle switches. In minutes virtually anyone can learn to operate the machine. Automatic shut-offs make over processing nearly impossible. All three sections operate simultaneously making high volume output easy and efficient.

Low Maintenance: There are very few moving parts and no complicated digital electrical systems. Only the Jet has a

Summer, winter and all-season composition rollers are available.	1	. 1
VINYLITH ROLLERS—We have received rave reviews for our Vinylith rollers from our custome		
with their performance on our own presses. Vinylith rollers offer superb ink distribution resulting		
greater ink efficiency with the longevity of standard rubber rollers. We agree with the discrimination	ng professiona	ıls who
have converted to Vinylith: these are the best letterpess rollers on the market.	DO 440	007.00
C&P Pilot 6 x 10, each		\$67.00

Vandercook Universal 1		\$169.00
Other sizes up to 3" in diameter and 6' long for flatbed presses can be made - call for details. We can make roll		ress.
CORE POLICY	, ,	
For all C&P Rollers we supply new cores. For Kluge rollers, above prices are with new cores. If you	ı have cores wi	th centers,
we will deduct \$15.00 for 10 x 15 and \$23.00 for 12 x 18. You must send in cores for recovering		
cores on the shelf, we will ship when your cores are found to be good. If we do not have exchange	cores, we will a	give you
\$20.00 credit when you send us good cores.	·

VANDERCOOK® SUPPLIES

From 1909 to 1975, Vandercook & Sons manufactured about 30,000 proof presses and related equipment. No new Vandercook presses have been made since then, but NA Graphics now owns the Vandercook Co. and can provide information, many parts, and supplies for these machines. We maintain a nearly complete file of the original Vandercook drawings and can provide custom new parts to the manufacturer's specifications. Furnish us with your Vandercook serial number and we will provide the original shipping date and first owner of your press. Serial number records are essentially complete to 1913. Vandercook is a registered trademark of NA Graphics.

VANDERCOOK ROLLERS

These prices are for recovering your cores, shipped prepaid to us. We maintain an inventory of new cores for the SP-15 and model 4 machines. Other cores are made to order. Remove gears, bolts, etc. before shipping to us, but note carefully how things came apart. If in doubt, please call.

Ordering Information

We accept MasterCard, Visa and Discover. We can take American Express, but ask for the billing details before using AMEX. Checks and money orders are welcome. Open accounts may be set up with satisfactory credit information. We will ship COD if requested, but if a delivery is refused for any reason, then prepayment on future orders is required.

Minimum Order: \$10.00

Prices shown in this catalog are subject to change without notice.

Sales Tax: Colorado residents pay 3%.

Shipping Charges: Actual cost plus a nominal handling charge. Most small packages are sent Priority US Mail which is cheaper and faster than UPS ground. All COD shipments are sent UPS. We ship foreign orders normally by Federal Express, or by US Mail to Canada.

Terms: Open accounts are Net 30 days. Past due accounts 30 or more days from original invoice date are subject to a 1 1/2% monthly service charge. Accounts 60 or more days past due must be paid in full before any additional shipments are made.

Returns: Any material returned for credit must be in sellable condition upon our receipt and must have our prior approval. We stand behind our products. New items not made by us carry the manufacturer's warranty. No returns allowed after 30 days from receipt—check it out when you receive your merchandise!

Quoins: We try to stock a good supply of used Challenge Hi-Speed quoins. Because they are used, we can not guarantee them in any way. Defective quoins need to be returned to us at once for credit or replacement. New quoins made by Bar-Plate have a warranty of 120 days from date of manufacture against defects in manufacture or material, and not from mis-use. Bar-Plate makes the former Challenge line. New quoins are special order because of Bar-Plate's strict warranty policy.

Shipments to NA Graphics: Please package your rollers, etc. in sturdy cardboard boxes sealed on all edges. Wood boxes incur additional UPS charges for handling and often arrive broken. Small items need to be adequately wrapped in case your carton splits open. Anticipate the worst in what may happen to your package!

Rollers: Please check with us before shipping rollers. As a rule, it is less expensive to furnish new cores for Kelsey and C&P rollers. We recover Heidelberg, Kluge, and Vandercook cores. We maintain a stock of new cores at our roller makers. Roller Wash — Do NOT use gasoline, kerosene, benzene, mineral spirits (paint thinner) or similar petroleum distillates on any roller supplied by us, except for composition rollers. A water-miscible roller wash, which we sell, or that can be obtained from any other source, is the only recommended cleaner for the synthetic rubber compounds currently being used. Our traditional letterpress solvents are too harsh on these rollers and will cause premature failure, swelling, pitting, etc. Water-miscible means that water can be mixed with the cleaner to reduce the strength and aid in the removal of paper fibers and paper coatings on offset presses. Use of any cleaner other than standard roller washes voids all warranties on new rollers. New rollers may last many years if proper care is taken with them.

Need Help? NA Graphics' owner, Fritz Klinke, has over 40 years of printing and letterpress experience and quite likely has an answer, or knows where he can find one, for your questions. A separate commercial letterpress shop is run by Fritz — he has C&P, Kelsey, Vandercook, Miehle, and Little Giant presses along with literally tons of other equipment.
