# POCKET SLIDING

B&B utilizes high quality materials like MDO, an exterior grade plywood with a high paper face saturated phenolic resin solids. MDO plywood is water-proof and weather resistant. Because this product is designed for exterior use, It works even better inside the home in areas that need to be smooth and hold up well to moisture. When applied with exterior grade primer and paint, this product holds up much better than regular plywood. The MDO plywood serves as a shear panel that keeps the frame square and rigid.

Shown is a custom designed multi door exterior pocket sliding door unit.

Barring variations, lift and slide hardware, and embedded track system are some of the possibilities that we can configure in an exterior pocket sliding door.

B&B's pocket sliding doors are designed to handle the stress and integrity of its structure. Time invested in research and development has led to design innovations that make our products stand out. Our proprietary metal reinforced designed stiffeners, shear panels, quality hardware and components keep our doors square and snug in their pockets and tracks. Each of our products are assembled and tested before they leave our factory to ensure that we are satisfied so we can in turn pass the satisfaction over to you.

This means years of smooth operation and enjoyment for you.

At B&B, we believe that time invested upfront is time saved for the future to provide you a product where quality matters most.

Metal reinforced jamb interlock frame adds extra rigidity and durability to the pocket frame.

MDO Exterior Grade Primed Shear Panel.

Shown above is a custom designed single door exterior primed pocket frame sliding door unit.

# WOOD SPECIES

# PREMIUM CHOICES

B&B uses a wide variety of wood species. Wood is a natural product that there are varieties even on it's own specie. In nature, no two are exactly alike. Nature gives each specie its own individual character. So the door you'll get will be as unique as yourself. At B&B we hand pick the parts and fabricate each one individually. Every one gets our attention.

Every door and window, louver and shutter can be built to your specifications. Your style in the wood of your choice is shown here.

Pick your fancy.

We begin with the right quality, premium grade material. That's how we end up with the right quality product.

# POCKETED PLEATED SCREENS

**B&B STANDARD POCKET SLIDING DOOR WITH PLEATED SCREEN**

B&B's pleated screens works with swing out doors, sliding doors, folding doors and best with pocket sliding door units especially multi-sliders. It's main feature is it's ability to cover a span of up to 14'-9" ft by 10 ft high with minimum effort. It folds amazingly into a compact size that can be tucked inside the pocket just out of sight... but this beauty can not be out of mind.

Shown is the pleated screen in the folded position stacked and compact.

## POCKET SLIDING DOORS

Vertical grain Douglas fir door with flat grain Douglas fir jamb  
Hand sanded solid wood, ready to finish.  
No veneers or finger joints.  
Standard 1 3/4" thick door  
Optional 2 1/4" thick doors. Doors can be made up to 12' tall with practically unlimited widths depending on unit configuration needed. 2 1/4" thick doors require extra large stainless steel super duty rollers to carry doors weighing up to 800 lbs.  
4" face stiles, 4" face top rail, 9" face bottom rail.  
Standard ovalo French detail or optional custom specification layout by request.

Accepts water or oil based top coat

### Wood preservative:

Penetrating and paintable  
Water repellant  
Protects against decay, fungi, surface mold and mildew  
Accepts stain or primer  
Reduces dimensional changes

## DOOR OPTIONS

Custom muntin bar configurations  
Endless panel options  
Matching sticking profiles  
Custom door layouts

## CONFIGURATIONS

Door configurations range from 1 wide, 2 wide, 3 wide, 4 wide, 6 wide, and even 8 wide with a pocket system. Additional configurations can also include single exterior pocket or double pocketed walls in the above options. Factory pocket frames are constructed with exterior grade MDO water-proof and weather resistant plywood shear panels installed to the inside of the pocket wall. These configurations can even include screens if desired.

## CUSTOM OPTIONS

On larger units we recommend the lift and slide hardware unit which allows the doors to fully lift above the floor or sill which allows an extremely easy non-friction operation. When the doors are closed and lowered it creates an excellent weather tight seal and secures the door. The hardware is all stainless steel and designed for larger and heavier than normal doors and bigger openings. There are many configurations available.
