

Hospital Emergency Room Program

New Day Outreach Ministries actively provide food to needy people, particularly in hospital emergency rooms. Recognizing that hospitals can be stressful environments, especially during emergencies, the ministry's initiative focuses on offering sandwiches and beverages to patients, families, and healthcare staff. This service aims to alleviate hunger and comfort those facing difficult circumstances. By distributing food in these critical areas, New Day Outreach Ministries demonstrates a commitment to community support, ensuring that individuals have access to nourishment in moments of distress.
