

Adopt A School Program

New Day Outreach Ministries adopting a school program involves a partnership where the ministry supports the educational institution by supplying essential materials for each grade level. This includes textbooks, notebooks, stationery, and educational tools tailored to teach grade level. The goal is to ensure students have the resources needed for academic success, particularly in underfunded or underserved schools. The ministry will coordinate with schools to assess the specific needs of each grade, ensuring the supplies are both relevant and sufficient. This initiative aims to improve educational outcomes.
