

The Ever-Changing Landscape of the Legislative and Regulatory Environment and its Impact upon the Cement Industry

Tom Tietz

Executive Director, CA/NV Cement Association

Anaheim, CA

tom.tietz@cncement.org

Abstract – California is on a world-leading path towards carbon neutrality that hasn't stopped or slowed. This presentation will explain how CNCA strives to remove barriers, combat threats, and explore opportunities along this rocky path that is filled with uncertainty. We do all this to ensure that the California cement industry survives and thrives in the next 20 years before the looming net-zero mandate in 2045.
