

Willoughby Museum 58 Johnson St Chatswood NSW 2067

www.watermetermuseum.org

Administered by the Willoughby District Historical Society, this small but significant house museum showcases artefacts from prominent local businesses as well as everyday items once used by residents of the district.

Notable displays highlight the history of the Mashman pottery works, later Royal Doulton/Caroma, Hallstrom refrigerators, local tanneries and coach builders, Speedo, Buzz Products, and Manu Electronics/ManuFlo, all of which either originated in or flourished within the area.

Also on display, on loan from the Historic Water Meter Museum, are three historic water meters: examples manufactured by Emmm and Davies & Kent, together with a very rare Davies-Shephard meter dating from the late 1890s.

The museum is housed in *Boronia*, a Federation-era cottage built in 1912 and bequeathed to the Willoughby District Historical Society by the late **Sonya Kirkham** in 1988.

Yesteryear kitchen

Installed at the property is an **Actaris/Itron CT5/TD8 20mm rotary piston PD water meter.**

3 x Historic Water Meters
