

## **Senior Citizens Assisted Living Program**

New Day Outreach Ministries' commitment to our seniors is never-ending. One can only imagine the wisdom they can offer from what their eyes have seen in their lifetime. Our program is designed to engage and support elderly and disabled seniors to age with dignity in nursing homes, memory care, and assisted living facilities. Many families are disappointed to learn that assisted living isn't covered by Medicare or other health insurance, since it's a form of long-term care. Many don't have enough income, personal savings, home equity, disability compensation, private health insurance, or other sources of income or assets to cover their costs. New Day Outreach Ministries will assist and contribute financially to cover some or all of the selected seniors' assisted living and memory care costs, especially those suffering from Alzheimer's and Dementia, and low-income individuals without long-term care insurance. This program seeks to improve the quality of life for some of our senior citizens by addressing their emotional and financial needs.
