➤ UPCOMING MEALS

4/29: Spaghetti w/meatballs, broccoli, salad, bread

➤ Club/District Announcements

MD2 State Convention, May 22 in College Station

Thank you Gerald Franklin – Pointe n Thyme Vape Store

➤ This Week's Program

A Big Thanks to Gerald Franklin of Pointe n Thyme Vaping for his presentation to the Club. While many of us have very different views on the subject of Electronic Cigarette use and its safety. I was very impressed the way Gerald has approached his business and its selling philosophy. While most Retailers are in this category for the quick buck, inflated margins due to its popularity and ride the big Money gravy train until FDA makes its findings and regulates how it's sold. Gerald has already taken the step to only sell to those trying to reduce or quit tobacco. Additionally he is only buying regulated US made, organic juices and helps them to reduce the nicotine levels of the juice as they continue the use. He has a wide variety of non-nicotine for those who just want the cessation of smoking.

From wiki:

An electronic cigarette (e-cig or e-cigarette), personal vaporizer (PV) or electronic nicotine delivery system (ENDS) is a battery-powered vaporizer which produces a similar feel to tobacco smoking. Electronic cigarettes produce an aerosol, commonly called vapor, rather than cigarette smoke, which the user inhales. In general, e-cigarettes have a heating element that atomizes a liquid solution known as e-liquid. They are available as one-time use products or as reusable products. E-liquids usually contain a mixture of propylene glycol, glycerin, nicotine, and flavorings. Some e-liquids lack nicotine. E-liquid without propylene glycol is also available. The benefits and health risks of electronic cigarettes are uncertain. One review found limited evidence of a benefit as a smoking cessation aid. Another found no evidence that they are superior to regulated medications for quitting smoking. Their usefulness in tobacco harm reduction is unclear. One review found they may be similar in safety to other nicotine replacement products. E-cigarette vapor contains fewer toxic substances than cigarette smoke, and is likely to be less harmful than traditional cigarettes to users and bystanders. No serious adverse effects from e-cigarettes have been reported in trials. Less serious adverse effects include throat and mouth inflammation and cough-The long-term effects of e-cigarette use are unknown.

In my opinion our Government is a long way from ever placing statements "safer than cigarettes" on any type of nicotine delivery method. I do know this, you are not inhaling Tobacco smoke or juice, which is what causes cancer, not the nicotine. In my resource I found that tomatoes, potatoes, cauliflower, and green peppers are known to contain nicotine. Guess I better go out there and rip out my garden.
