Core Competencies

Laszlo Corporation, can help Government and Military facilities and Prime Contractor in their requirement for fire protection and suppression with Komodo K500C, and Komodo K911.

Laszlo Corporation, supplies new green technology that is safe for personnel, assets, and the environment. After ten months of USDA testing Komodo K500C was approved and listed on the Federal Register and QPL. Komodo K911 is made from the same formulation.

Benefits:

- Komodo is a new Green Technology formulation that protects, retards, and suppresses fire.
- K500C is free from PFOS, PFAS, PBDE and other restricted chemicals.
- Water and other products, when used to establish an ingress or egress, can evaporate, and reignite.
- K500C performs wet or dry and can be sprayed on any asset requiring protection from fire.
- K500C and K911, when applied to an asset's surface or accelerating agent, prevents reignition.
- Komodo K911 is available in 16 oz spray cans, that can be stored in any workstation, or a vehicle on land, sea, or air.
- Komodo K500C or K911 provides for ease of use and clean up, compared to existing fire extinguishers.

Differentiators

Komodo products are green, safe, and made with organic materials. Developed in Silicon Valley, Komodo is on the cutting edge of fire protection. Komodo's cleanup is easier and environmentally safer compared to the competition. Komodo K911 is Class A, B, C, D, and K certified, and USDA Approved. The competition does not match Komodo's record.

Komodo is unmatched with its combination of protection, retardant, and suppression; all in one product. To match these features, several competitor's products would have to be purchased to match Komodo's functionality. The competition is a retardant only or suppression only product.

The pricing for and the benefits received, by State and Federal Government's and Military agencies, makes Komodo a best buy.

Company Data

Komodo products perform above expectations and suppresses fire at its infancy, limiting asset damage. A tool for land, air or sea operations. The 16 oz spray can be stored in any workstation to ensure fire protection readiness.
List Specific Codes:

- Veteran Owned Small Business, VOSB.
- DUNS: 07895-7904
