

## Pet Programs

We can't forget about your other family members! St. Michael's Holistic Natural Health Center even has a program for your canine and feline friends. While many humans take dietary supplements, it is assumed that every dietary supplement is also safe for your pet. Not true! In fact, some can even harm or fatally injure your dog and/or cat. We have special professional products designed especially for your pets.

I am also certified for holistic programs for you pets. We can even work with your pet's veterinarian care. They are here for a very short time. We need to make their time valuable. They are even valuable. We humans speak all the time, and we have a hard time stealing people's heart. They can't say a word, and they immediately grab our hearts.

Learn how it takes smaller number of carcinogens to cause cancer in smaller creations. By avoiding tap water and commercial pet foods that are often laced with flavor agents, dyes, chemicals, yes even road kill processed by rendering plants and preservatives, we can give them a healthier life.

From vitamins, herbal products to specialized products made to enhance the immune system and other body systems. They are made right here in the USA!
