

Enterprise cybersecurity advisory platform. Expert-validated. AI-powered.

Managing strategic cybersecurity operations—from risk and compliance to threat management and crisis preparedness—requires deep, multidisciplinary expertise most organizations don't have. Large in-house teams are prohibitively expensive. Big 4 consultants deliver one-off, multi-month engagements at premium prices. Meanwhile, regulations evolve, threats accelerate, and the gaps widen.

What if Fortune 100-level cybersecurity expertise were instant and affordable?

That's Blackwire: expert advisory delivered at machine speed.

Real outcomes

70%

time savings across
routine security tasks

3HRS

to mitigate
BEC attack

180K

avoided in security
hiring costs

200K

saved on CIS Controls
analysis, in minutes

15 hours vs 8 weeks

delivering tabletop exercise with half the staff

The Platform

Blackwire.ai is a cybersecurity advisory platform that provides expert-validated guidance across governance, compliance, threat management, and crisis readiness. Instead of waiting weeks for consultant reports or months to staff specialized roles, you receive specialist-grade insights in seconds—backed by research from 60+ vetted experts across the most influential security practitioners, leaders, and technologists in our community.

**Blackwire transforms time-intensive security work into instant intelligence.
Here's how security teams are using the platform:**

Compliance & readiness

Automated gap analysis across HIPAA, CMMC, ISO 27001, NIST, and CIS Controls—updating your compliance posture in minutes with audit-ready documentation.

Crisis preparedness

Realistic threat scenarios and tailored tabletop exercises—testing readiness and enabling confident decisions under pressure.

Threat management

Autonomous monitoring, industry benchmarking, and executive-ready reporting to stay ahead of global threats.

How Blackwire.ai works

1 Bring your context

Upload your security policies, compliance requirements, and tool outputs. Connect your existing platforms via API to maximize your technology investments.

2 AI analyzes with expert knowledge

Specialized AI agents analyze your query against our continuously updated, expert-curated knowledge base. Whether you need a gap analysis, threat brief, or policy review, agents process your specific context against industry frameworks and emerging threats.

3 Verify and attribute

Cross-discipline knowledge bases undergo rigorous source evaluation and confidence scoring. CCOE interviews and original research generate unique, verifiable insights. Secure customer knowledge hosting with complete citability—no guesswork, just traceable, defensible outcomes.

4 Get instant, actionable results

Receive specialist-grade guidance with full documentation. Update compliance postures, generate board reports, or operationalize threat intelligence—all at machine speed with expert-level quality.

Why customers choose Blackwire

**Purpose-built
for cybersecurity**

**Complete
team coverage**

**Continuous
intelligence**

Compliance-ready

Cost efficient

**Vendor
agnostic**

What our customers say

“Blackwire.ai is a force multiplier for my team and makes a real difference in our cybersecurity operations.”

Global CISO

“Blackwire.ai helped us prepare for our CMMC certification, leading us confidently into our audit.”
