

LIFT AND SLIDE

When a 'no sill' option is required, we use **Functional Fenestration Inc. FFI FASTrack** lift and slide tracks for adjustability, dependability and precision. These rigid tracks are embedded below the floor finish. Only 3/8" of the tracks are exposed over the finish floor.

B&B doors and windows offer the highest quality craftsmanship with years of experience behind every door and window we sell.

We offer a wide variety of standard and custom made products using our laser accurate computerized CNC routers with the finest materials available.

At B&B, extreme care is taken from the time we receive your order until the time it is delivered to ensure that all the details are complete and to your specifications. We have worked closely with many architects to recreate and restore or even create something entirely new and unique.

Compliment your home with the beauty of wood crafted with B&B's computer controlled CNC router combined with 35 years of experience and enjoy a lasting return on your investment.

WOOD SPECIES

PREMIUM CHOICES

B&B uses a wide variety of wood species. Wood is a natural product that there are varieties even on it's own specie. In nature, no two are exactly alike. Nature gives each specie its own individual character. So the door you'll get will be as unique as yourself. At B&B we hand pick the parts and fabricate each one individually. Every one gets our attention.

Every door and window, louver and shutter can be built to your specifications. Your style in the wood of your choice is shown here.

Pick your fancy.

We begin with the right quality, premium grade material. That's how we end up with the right quality product.

LIFT & SLIDE

B&B only use proven quality hardware that work with our products and this means attention to detail. The more attention to detail we put into our products, the more we produce quality items. To us quality begets quality, that is why we choose our hardware wisely. Only the best for the best and that keeps the ratings on the top.

We are proud of our Lift and Slide. The hardware lifts and you just slide effortlessly. The hardware does all the lifting and hard work as for the sliding, well anybody knows that's the easy part.

FFI handle and available pull collection

Locks with SST box and drive rod, aluminum lock face

Lift Slide handles - removable handles and pulls available in brass and SST.

Lift & Slide Screens

Our pleated screen virtually vanishes against the frame as it gets neatly tucked-in when it is opened.

1 pleated

The pleated screens folds into a compact stack and a single unit can effortlessly stretch & cover up to 14'-9" ft wide opening with minimal spring back force. This is an excellent choice for exterior pocket sliding and multi-slide units. It's ability to cover a wide opening does the job that's only 1.2" deep. Now that's impressive.

This beautiful screen can be configured in different ways.

1. Surface mounted stacked on jamb, single or paired.
2. B&B's innovative pocketed frame design version single or paired.
3. The postless corner model surface mounted to the jamb or pocketed and meets in the corner.
