

# FOLDING DOORS

## beautiful

Outside is so beautiful that we just have to open up the walls and let the outside come in. B&B's favorite custom door is the folding door. We manufacture our doors with superior craftsmanship and attention to detail enough to entice nature to come in. Custom designing and building the doors allows for limitless ideas and configurations with uncompromising quality. B&B utilizes AutoCad and CNC equipment to design and fabricate your custom dream doors. Our CNC machine do both standard and custom precision cuts. We use quality *CENTOR® Eclipse E3™ & E4™* hardware that is available in 304 brushed stainless steel and PVD bronze.

B&B's high standard of perfection has served as our most effective marketing tool through customer satisfaction. Architects, contractors, and home owners have come to realize B&B's craftsmanship offer the quality they seek. This known standard of quality within B&B's doors makes your unique finishing touch to your home a reality to last you through the years.

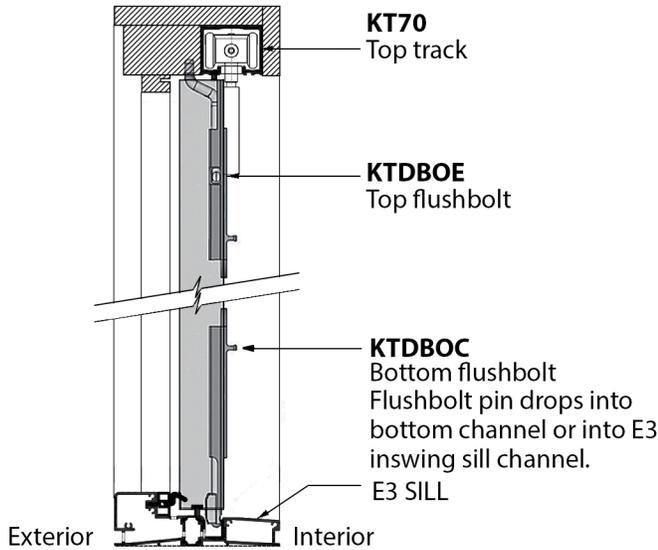

Our precision CNC machine cuts and routs with the tolerance of within thousands of an inch.

## Flushbolts & Sill Profile For Inswing Folding Doors

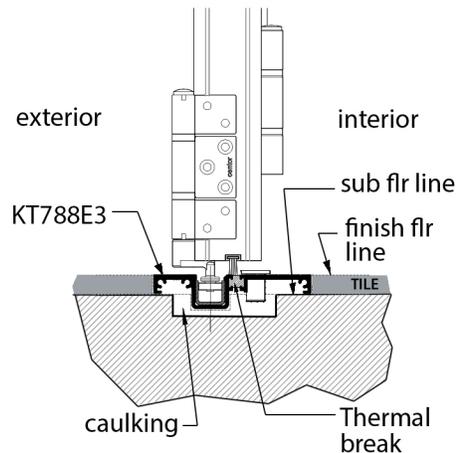

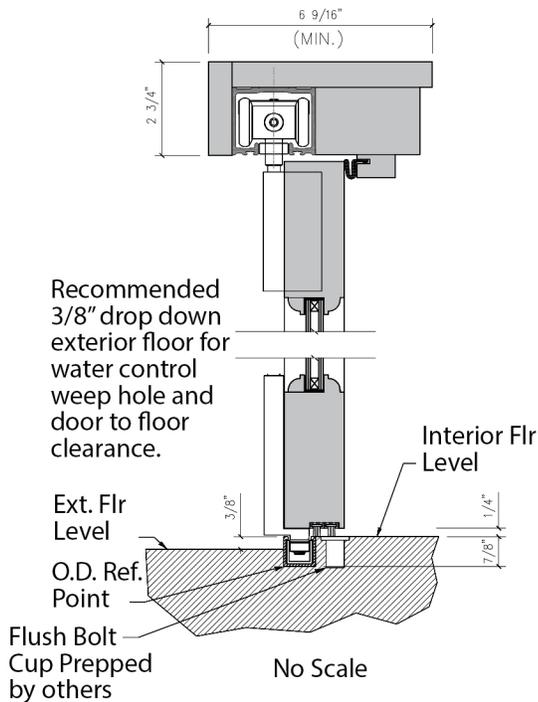

Standard Minimum Jamb is 6-9/16"  
for 1-3/4" door.

## KT788 E3 ADA Low Rise Aluminum Sill for Outswing folding Doors

Minimum Jamb 6-9/16  
for 1-3/4" door

## Embedded Track Sill Profile For Outswing Folding Doors

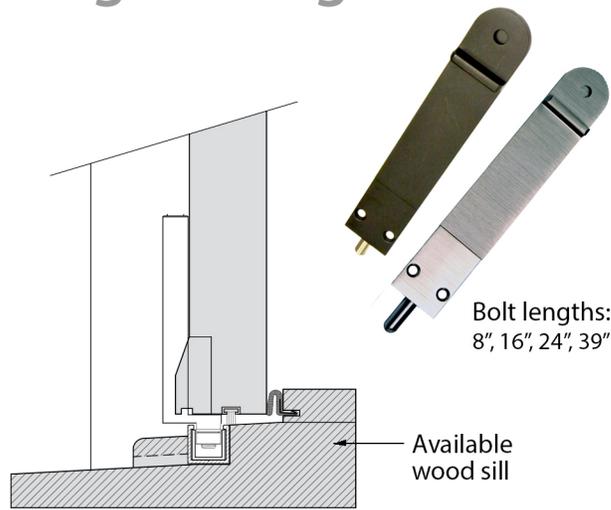

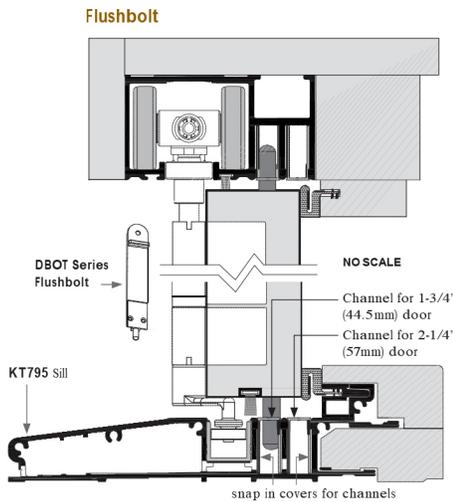

Slopes on the low rise ADA sill  
may be ripped off to achieve a  
flush sill application.

Available sill finishes :  
KT788E3C Clear anodized  
KT788E3D Bronze anodized

## Special Custom Models like Corner Units and Radius Applications are available.

Minimum Radius: 14'-7" (175") to inside face of track.

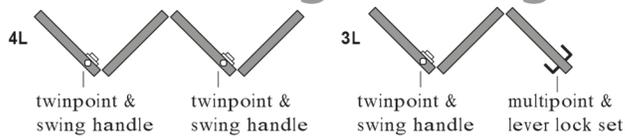

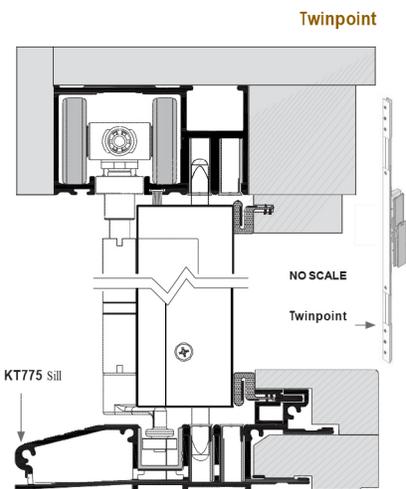

# Flushbolts For Outswing Folding Doors

The flush-mounted flushbolts, rounded style and 1" (25mm) throw are designed for use with folding doors.

The bolts are easily installed with a dedicated router bit and are readily available in two finishes. Bronze powder coat on aluminum to match the pvd bronze hardware and brushed metallic to match stainless steel hardware.

# Twinpoint System For Outswing Folding Doors

Minimum standard jamb width on exterior folding door unit with twinpoint is 6-9/16". B&B's modified minimum jamb width on exterior folding door with twinpoint is 5-3/4".

The LT2 operates easily with a simple handle rotation, driving a 1" (25mm) throw into the head and sill. This makes it one of the most secure bolt locks on the market. An installed Twinpoint system is completely accessible and serviceable. For people with mobility impairments, the Twinpoint offers the security of two flushbolts, but without the access problems associated with flushbolts being too high or low to reach, and hard-to-grip door handles. LT2 has the sleek and clean styling synonymous with all Eclipse products. Their low profile allows any folding system, such as F3, E2, E3 or E4 to stack neatly, without intrusive door getting in the way. Eclipse Twinpoint locks are fully concealed within the door stile, avoiding long or hard-to-reach dropbolts fixed to the door face, particularly on tall doors. The Eclipse Twinpoint is an unobtrusive, functional and sleek locking solution.

Above is the **twinpoint** lock system.  
For **ADA** sills, **Twinpoint** and **Multipoint** lock are available only on the outswing model.

## LT2 twin point warranty.

The Centor LT2 has been tested to 100,000 cycles at maximum configuration to ensure smooth working order beyond their 10 year warranty period. The LT2 Twinpoint locking system has also been exposed to dust, mud, sand and corrosive atmospheres to ensure they stand up to real life use. This includes exposure to salt spray for seaside installations.

## EXTERIOR FOLDING DOORS

### BASE UNIT

Vertical grain Douglas fir door with flat grain Douglas fir jamb  
Hand sanded solid wood  
No veneers or finger joints  
1 3/4" thick door  
4" face stiles, 4" face top rail, 9" face bottom rail
